Summary

I'm a front-end developer with 5 years of hands-on experience building responsive user interfaces and web experiences, including 2.5 years of professional experience working at an enterprise software company. I have a strong eye for detail and continually look for ways to refine and improve the user experiences that I build.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS, SCSS, Less, Bash
Libraries & Frameworks: React, Express.js, Vitest, Bootstrap, Animate.css
Tools & Platforms: Git, Node.js, npm, Umbraco, Linux, Vim, Photoshop, Inkscape

Professional Experience

Front-end Developer - GrapeCity
October 2022 - March 2025

- Developed and maintained reusable, responsive UI components within the Umbraco CMS.
- Independently navigated the existing Less codebase to identify and update styles, improve responsive layouts, and resolve front-end display issues.
- Developed a JavaScript automation script to extract and aggregate numerical data, replacing a manual data collection and calculation process.
- Resolved website bugs and implemented requested improvements based on Jira tickets submitted by marketing and other internal teams.
- Established a biweekly technical site-health reporting process and collaborated with cross-functional teams to eliminate 2,000+ 404 errors and improve SEO performance.

Projects

Remix Store - React, SCSS
GitHub | Live Demo

E-commerce web application built with modular React components and client-side routing using React Router. Implemented dynamic state management for a functional shopping cart.

Interior Design Page - HTML, SCSS, JavaScript
GitHub | Live Demo

Responsive interior design landing page developed from a designer's prototype, featuring detailed layouts, interactive elements, and custom JavaScript functionality.

Etch A Sketch - HTML, SCSS, JavaScript
GitHub | Live Demo

Browser-based drawing application built in vanilla JavaScript (ES6+) using direct DOM manipulation, with dynamic grid sizing, erase, RGB, and ink-color features.
